## General information

---

According to [Wikipedia](#), the cat is a domestic species of small carnivorous mammal. Many people think they own a cat, but in reality it's the other way around.

Figure 1: Cat translator using a CAT tool.

## Cat breeds

---

There are many breeds of cats, for example:

- Ragdoll
- Sphynx
- Devon Rex
- Normal freaking cat (a.k.a. "mog")

Figure 2: Cats do commit incest. Here: an inbred cat.

## How to get a cat?

---

Cats can be bought, found, or stolen.

## Maintenance cost

---

The cost of maintainaig a cat is marginal compared to the accompanying depreciation of assets such as furniture due to biting, scratching, or urination.

## Castration

---

Castration of cats is generally more acceptable than castration of humans, and unlike the latter it is usually performed to the benefit of every party involved.

## How to understand your cat?

---

You can read your cats' needs from their body language. If they wag their tail, run, jump, meow, breathe, or have their eyes open or closed – they are hungry.

## Hygiene

---

Cats clean themselves so you don't have to. Hopefully, you understood this sentence correctly.

## Play

---

Cats are very entertaining. If you like to play, they can definitely scratch that itch.

## Training

---

Cats can be trained through positive conditioning. Follow the steps below to teach your cat how to follow you to the kitchen.

1. Optional: Give your cat some food.
2. Optional: Snap your fingers while performing step 1.
3. Required: Snap your fingers at another time as you go to the kitchen.

Now observe your cat follow you to the kitchen whenever you snap your fingers.
